ROGUE VALLEY Door

COARSE GRAIN FIR COLLECTION

COARSE GRAIN EXTERIOR & INTERIOR DOORS

At Rogue Valley Door we slice our own veneers and then meticulously grade them to ensure only the highest quality fiber is used in our wood doors. In the past, only a small percentage of this wood could make the grade and pass our quality inspection. With a fresh approach we knew we could positively impact the environment, save a precious dwindling resource and make use of the stock that had small blemishes and minor imperfections.

The result is Coarse Grain Fir doors, a new upcycled Rogue Valley Door product. We take those naturally occurring imperfections found in wood and create a unique treatment for these small blemishes and minor defects, resulting in a perfect match for distressed or weathered design. These doors are a perfect fit for your Cabin, Lodge, Mountain Retreat or anywhere you are trying to create a warm old meets new look.
